NARESH PALLE

AI AUTOMATION & SOLUTIONS ARCHITECT | DEVOPS & PLATFORM ENGINEERING

Hyderabad, India | nareshepg@gmail.com | +91-789-301-5454
LinkedIn: linkedin.com/in/nareshpalle | GitHub: github.com/npallegoud | Portfolio: binaryblogs1.wordpress.com

PROFESSIONAL SUMMARY

Technology professional with 12+ years of IT experience spanning quality engineering, test automation, DevOps, cloud-native platforms, and emerging AI-enabled automation. Combines hands-on experience in AWS, Kubernetes, CI/CD, infrastructure as code, observability, and software testing with practical development of AI-powered applications and workflow automation. Interested in AI Automation Architect, AI Solutions Architect, Agentic AI Consultant, and enterprise automation roles where engineering foundations can be used to deliver useful, secure, maintainable solutions.

CORE SKILLS

AI & intelligent automation: Generative AI concepts, LLM application patterns, prompt engineering, RAG concepts, AI agents, n8n workflow automation, API integrations, human-in-the-loop workflows

Cloud & platform engineering: AWS (EC2, EKS, VPC, Route 53), Kubernetes, OpenShift, Docker, Helm, Terraform, Ansible

CI/CD & GitOps: Jenkins, Git, GitLab, Argo CD, deployment pipelines, release automation

Quality engineering: Functional, regression, API, security and performance testing; Selenium WebDriver, Playwright, Robot Framework, OWASP ZAP

Observability & reliability: Prometheus, Grafana, Kibana, OpenSearch, incident investigation, root-cause analysis, monitoring

Programming & data: Python, Shell scripting, REST APIs, MySQL/MariaDB, PostgreSQL, Redis

PROFESSIONAL EXPERIENCE

Senior QA / DevOps Engineer – AI & Automation Focus
Enea AB | Hyderabad, India | Apr 2014 – Present

- Work across quality engineering, DevOps, cloud-native platforms, and automation in telecom and cybersecurity software environments.
- Support Kubernetes-based deployments and platform operations across AWS EKS, OpenShift, and Linux environments.
- Build and maintain CI/CD workflows using Jenkins and Git, integrating automated checks into delivery processes.
- Use Terraform and Ansible to codify infrastructure configuration and improve deployment repeatability.
- Apply monitoring and troubleshooting practices using Prometheus, Grafana, Kibana, and OpenSearch to investigate system and application issues.
- Develop and maintain automated testing approaches for functional, regression, API, and security validation using tools including Selenium, Playwright, Robot Framework, and Trivy.
- Explore AI-assisted engineering workflows, including LLM-supported analysis, RAG-oriented knowledge retrieval, and n8n-based workflow automation.
- Collaborate with engineering teams and mentor junior testers; coordinate test execution, defect triage, release readiness, and technical problem solving.

SELECTED PROJECTS

Yatrika AI Travel Planner: AI-enabled travel-planning application that helps users organize destinations and itinerary ideas. Built with a web frontend and Supabase-backed services. Live: yatrikaai.vercel.app

Palram AI: AI and digital-solutions initiative focused on AI applications, agents, automation, websites, and software solutions. Website: palramai.in

CR8 Social Platform: Creator-and-brand platform concept with discovery, creator profiles, campaign-related workflows, and social-media integrations. Built with a frontend, FastAPI backend, MongoDB, and scraping/API integrations.

Cloud-native DevOps Automation: Hands-on work with AWS/EKS, Kubernetes, Terraform, Helm, Jenkins, and Argo CD to provision infrastructure and support repeatable application deployment.

Internal Technical Knowledge Assistant – RAG concept: Exploration of a secure internal assistant grounded in technical documentation such as Kubernetes, AWS, Docker, Helm, Jenkins, Linux, Terraform, and Ansible documentation.

EDUCATION

Bachelor of Science (B.Sc.), Computer Science | Osmania University, Hyderabad

PROFESSIONAL FOCUS

AI Automation Architect | AI Solutions Architect | Agentic AI Consultant | Enterprise Automation | DevOps / Platform Engineering with AI enablement
